

KAIST FALL 2024

CS473: INTRO TO SOCIAL COMPUTING

SOCIAL.CSTLAB.ORG

Class 06: Interactions II

2024.09.24
Joseph Seering

Administrative Notes

- Looking ahead: DPM #1: Ideation studio on Thurs
 - Presentation order randomly determined
 - You will not be able to edit your slides after 10:30AM!
- Any questions?
- DPM#2 studio will be the next class after DPM#1 studio!

Design Project Milestone #2: Pitch

Deliverables:

- In-class studio presentation on 10/08.
 - Up to 8 mins presenting / 7 mins Q&A
 - All team members must participate in the presentation
- Report due by midnight 10/09.

The studio presentation is basically a draft/summary of the report. It's the same content, but presented for discussion. You should incorporate feedback from the studio into your report.

Design Project Milestone #2: Pitch

What you need to do:

1. Problem statement
 - Present convincing references and evidence that the problem exists
2. Proposed solution
 - Describe in words + sketches/storyboard
 - You do NOT need a low-fidelity prototype yet. That's DPM#3.
3. Present 3-5 “tasks” that your system will help users do. For example:
 - Review internship opportunities
 - See other students' feedback on their past internships
 - Give feedback on your own past internships
4. Share your plan:
 - In your team, who'll be responsible for what?
 - What is your timeline for each of the to-dos?
 - How will you find the crowd or users to use and test your system?
